

Model SP01

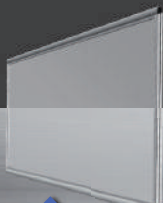

Aluminium Safety pool fences

The only permanent preventive way to keep your pool safe

Suitable for private and collective use

Choice of 3 lengths: 1m, 1m50 et 2 m (pre-made in glass version)

Plastic version

Laminated glass

Aluminium version

Reliable product
Attractive
finition

Patented built-in
locking system

- Attractive and robust
- Adaptable to all shapes of swimming pool
- Easy to install
- NF P90-306 Standard compliant

This fence is intended to prevent children under 5 reaching the pool. A fence is however no substitute for close adult supervision. We recommended installing the fence at least 1 meter from the pool edge. For private swimming pools, avoid placing the fence too far from the pool as this can counteract its effectiveness

Modules pré-assemblés de 1m, 1m50 et 2 m (sur mesure en verre)

Components: posts, panels and door
Anchoring: 2 anchor bolts per pots or doorway
Height: 1m22 (SP01) - 1m14 (SP03)
Garantee 2 years parts and shipping.

When the safety barrier is used in conjunction with walls, the walls must be high enough (at least 1m10 high between support points) to prevent access by climbing and not allow access though gaps, doors, windows, etc. (doors and windows must be fitted with childproof locks).

Read attentively and keep for a later consultation.
